FROM OUR EDITOR

Dear Stakeholders

As of February, we met with our students and the Spring term started quickly with student-centred trainings and productive activities. We are very happy with the news we receive from you and include in our e-bulletin. In this article, I would like to continue the series of informative articles about YÖKAK Standards that I started last month and I will talk about **Mission and Strategic Objectives**, which is the second title under the main title of **Leadership, Governance and Quality**.

Mission shows the reason for an organization's existence, and vision shows where it wants to be in the future. Institutions set strategic goals and objectives to realise their mission and vision, monitor these goals with performance indicators and share the results with the public. According to standard requirements;

Mission, Vision and Policies are announced to all stakeholders and it is ensured that everyone knows the direction we look in common. We have devoted one page of our bulletin to the mission and vision as a reminder. Likewise, there are policies on education and training (including distance education), research and development, social contribution, governance system and internationalisation. All this information is available on our university's website, the quality website (www.kalite.altinbas.edu.tr) and through the alyans system. These elements shape the corporate culture and provide guidance for a sustainable future. They are reviewed and evaluated at certain intervals. The Quality Assurance and Quality Improvement Procedure defines quality assurance and manages our processes in line with the guidelines. All these processes are shaped by the opinions and suggestions of our stakeholders.

Strategic Aims and Objectives: Our Strategic Plan and Quality Assurance Directive is defined and the strategic plan of our institution has been prepared by taking the opinions of our internal and external stakeholders in line with this procedure, and performance indicators for the targets are actively monitored and reported to you, our stakeholders. Our new Strategic Plan was prepared with the participation of all our stakeholders with the Strategy Planning Board and Strategy Development Team. Our new period strategic plan goals were created in integration with YÖKAK Standards and our processes followed by YÖKAK, and the United Nations Sustainable Development Goals were also taken into consideration. Our performance indicators are monitored during the target achievement phase and analysed at specified periods. Stakeholder opinions are received every month and evaluated in the commission and improvement is planned when necessary.

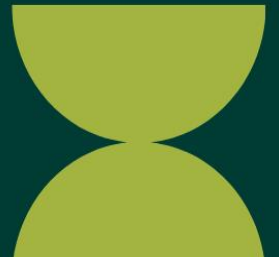

Performance Management: Performance management mechanisms are handled with a holistic approach. Key performance indicators are included in our strategic plan. There are also other performance indicators determined by the departments in their strategic plans. Performance indicators are measured every 6 months and the results of the analyses are reported. The performance management system will be converted by the Department of Information Technologies and Security into an internet-based system from which data can be extracted. Work on this issue is ongoing. Improvement is planned for deviations in performance indicators.

In my next article, we will continue our series of articles with the third title under the title of Leadership, Quality and Governance. Our bulletin is full thanks to you.

We wish you a pleasant reading.

STRATEGY DEVELOPMENT AND
QUALITY ASSURANCE MANAGER

FROM OUR EXPERT

Dear Stakeholders of Altınbaşı University,
I am very happy and grateful to meet you in this corner of our e-newsletter, to work at this university, and to bear the responsibility of preserving its valuable heritage and opening new horizons.

In our field of work, we are developing various strategies to improve the quality of the university. We make many efforts such as ensuring that students take a more active role in the education and training processes, participating in improvement efforts by measuring the satisfaction level of our academic and administrative staff, and taking a close interest in research and innovative activities. Seeing the results of these efforts makes us feel extremely happy.

It is a great honor and happiness for me to be able to contribute to this valuable experience as we move towards getting better with every step. I would like to thank our Rector Prof. Dr. Çaęrı ERHAN for his valuable contributions to the quality efforts of our university with his outstanding leadership and determination.

I would like to thank our department head Asst. Prof. Özgöl ÖZKOÇ for her support and leadership.

I would like to thank my teammate Eda Gülbakan, with whom I always enjoy and benefit from working together, and look forward to accomplishing more beautiful work together.

I would like to thank all Altınbaşı University staff who work with commitment to the mission and vision of our university, strengthen our corporate culture, help us achieve our common goals, and contribute to the development of our university.

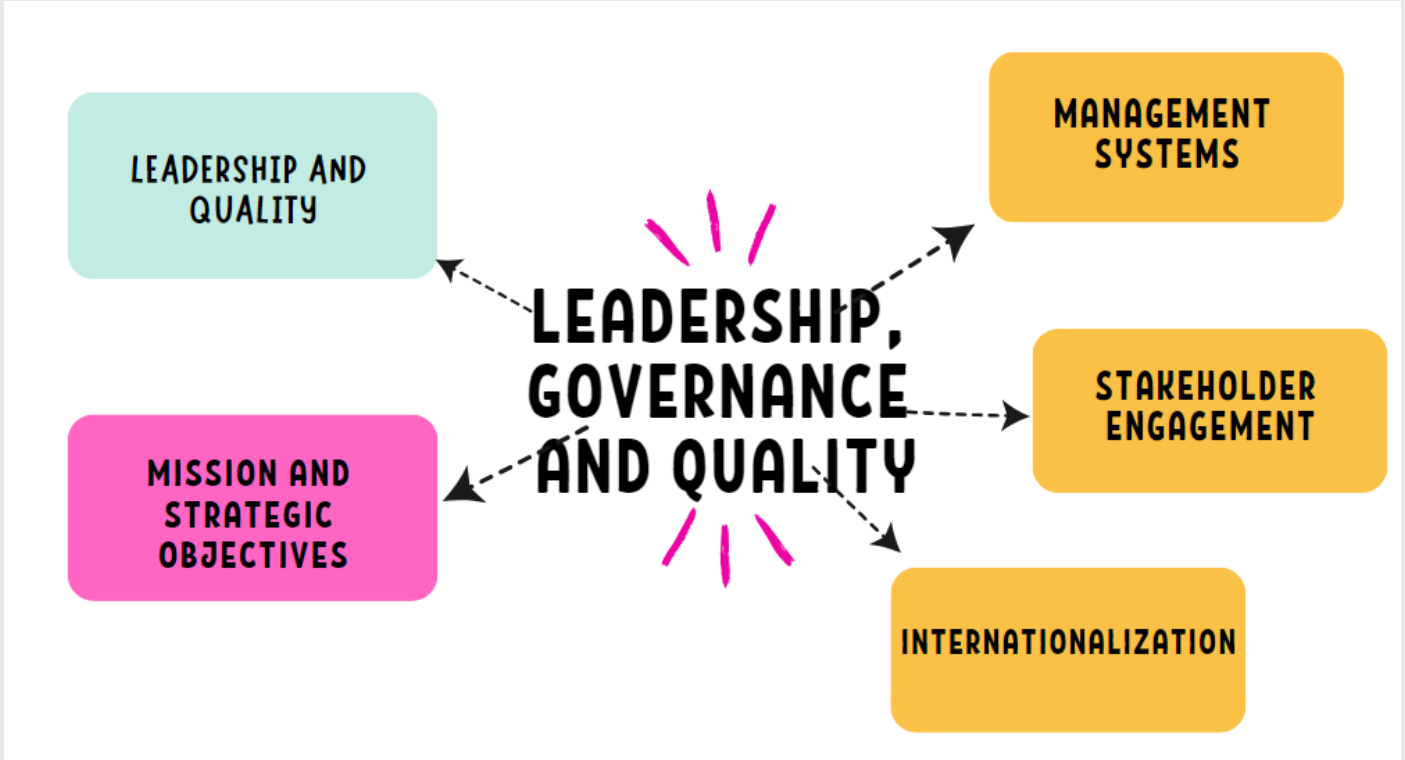

I wish you a pleasant reading.

Melike Yazıcı Altınbaşı

Our Mission

To be a solution-oriented university that updates itself in line with the needs of the world and Turkey, has an innovative, application-oriented and learner-oriented approach, prioritizes innovation, provides free research opportunities and environment, and makes original contributions with a sense of social responsibility.

Our Vision

To be a university that makes a difference in the professional field with its graduates and adds value to universal science.

#PharmacyFaculty

Pharmacovigilance includes studies carried out to monitor and evaluate the safety and efficacy of drugs after they are introduced to the market. Thanks to pharmacovigilance, drug safety is ensured by continuously

monitoring whether a new drug has any side effects or unexpected effects. In the Pharmacovigilance Seminar organized by the Department of Pharmacology and moderated by Gaye Hafez, Dr. Seyfullah Dağistanlı, President of the Turkish Pharmacovigilance Association, discussed in detail the development of pharmacovigilance, the establishment of TÜFAM in Turkey and current processes. In her presentation titled "Regulatory Requirements for Safety and Risk Management in Post-Market Authorization Medicines", Dr. Maria Teresa Herdeiro from Aveiro University, Portugal, talked about the history of pharmacovigilance in Europe and the work carried out by important pharmaceutical authorities such as the European Medicines Agency (EMA). The presentation provided students with the opportunity to understand the importance of pharmacovigilance and current developments on an international scale. At the seminar, the participants gained valuable information on the direction of their future careers.

Abstract: Today, the IoT has become a vital part of our lives because it has entered into the precise details of human life, like smart homes, healthcare, eldercare, vehicles, augmented reality, and industrial robotics. Cloud computing and fog computing give us services to process IoT tasks, and we are seeing a growth in the number of IoT devices every day. This massive increase needs huge amounts of resources to process it, and these vast resources need a lot of power to work because the fog and cloud are based on the term pay-per-use. We make to improve the performance and cost (PC) algorithm to give priority to the high-profit cost and to reduce energy consumption and Makespan; in this paper, we propose the performance and cost–gray wolf optimization (PC-GWO) algorithm, which is the combination of the PCA and GWO algorithms. The results of the trial reveal that the PC-GWO algorithm reduces the average overall energy usage by 12.17%, 11.57%, and 7.19%, and reduces the Makespan by 16.72%, 16.38%, and 14.107%, with the best average resource utilization enhanced by 13.2%, 12.05%, and 10.9% compared with the gray wolf optimization (GWO) algorithm, performance and cost algorithm (PCA), and Particle Swarm Optimization (PSO) algorithm.

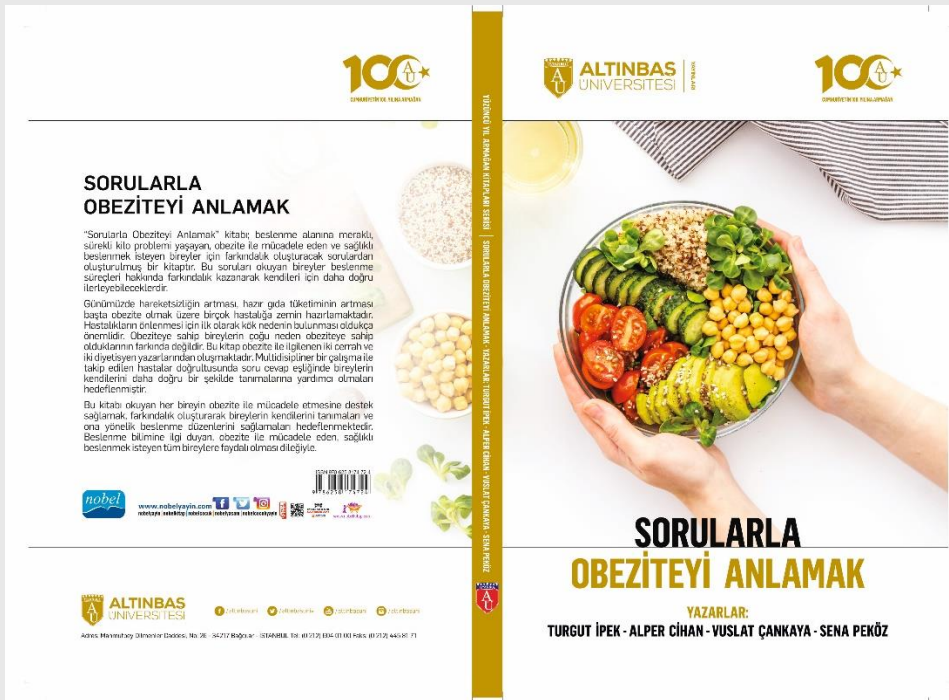

Keywords: fog–cloud computing; task scheduling; energy consumption; Makespan; resource utilization; cost scheduling

In this study titled "Vaccination with its Legal and Medical Aspects in Fifty Questions", care has been taken to explain the issues related to vaccination and vaccination services based on scientific data, information shared by national and international health institutions and regulations. By examining the decisions of the European Court of Human Rights and the

Constitutional Court, the right to life and health and the conditions for a vaccine to be compulsory in the light of interference with bodily integrity are examined. In addition, the right to custody and the principle of the best interest of the child have also been evaluated in the context of the compulsory vaccination debate.

#Dean of Research

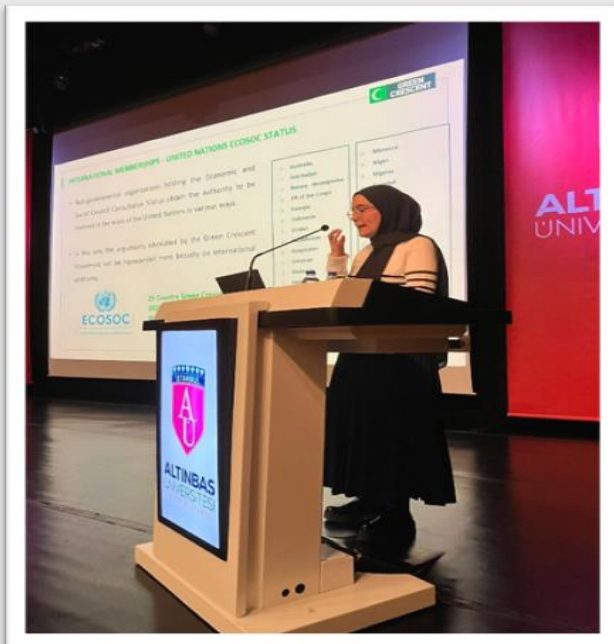

On February 29th, the candidate selection and interview processes of our project, which was supported by the Istanbul

Development Agency within the scope of the Talent Istanbul call, were completed in Bağcılar Municipality. The project will provide software training to 120 young people between the ages of 18-35 in Istanbul. Candidates who successfully complete the training will also be provided with internship and job opportunities in cooperation with Yıldız Technopark.

Addiction Event

#DeanofStudentsOffice

Bakırköy Green Crescent and Young Green Crescent Club of our University organized a training on Combating Addiction in Turkey. The language of the training was English and all participants (50 people) were international students
